

Independent Engineering

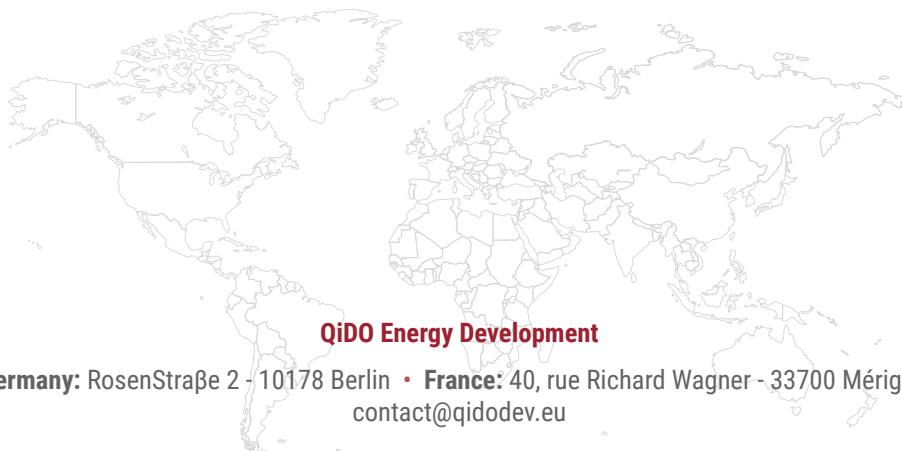

Throughout the development process
of your renewable energy project,
we help you reach your **strategic goals**:

- **Secure your investments**
- **Maximize your returns**
- **Optimize your cash flows**
- **Mitigate your risks**
- **Engage your stakeholders**

We provide our expertise in the following services:

- Market analysis
- Risk assessment & Mitigation strategies
- Technology assessment
- Capex and Opex analyses
- Wind / Solar Resource Assessment
- Energy production estimates
- Financial Modelling
- Feasibility studies
- Contract review
- Regulatory support

- Negotiation support
- (PPA, EPC, TSA, LTSA, TS)
- Construction supervision
- Operations and Maintenance reviews
- Performance assessment
- System design
- Operations and Maintenance reviews
- Project Development
- Owner's engineering

QiDO Energy Development

Germany: Rosenstraße 2 - 10178 Berlin • **France:** 40, rue Richard Wagner - 33700 Mérignac
