

Independent Engineering

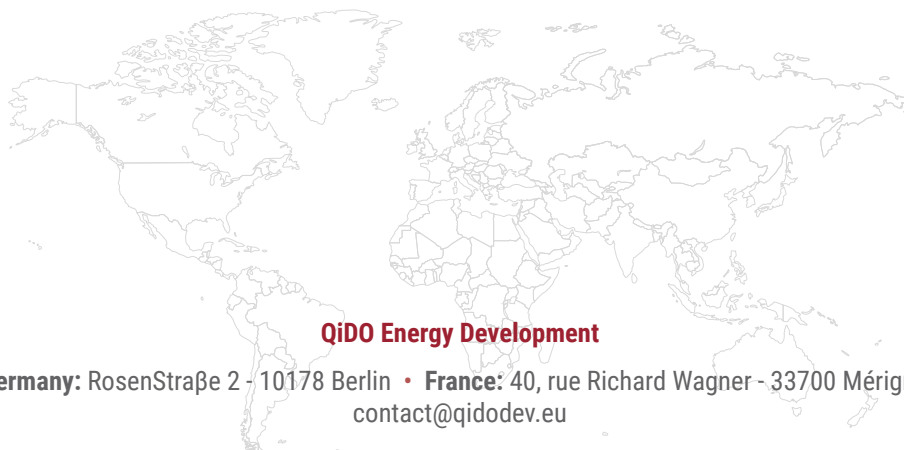

Throughout the development process of your renewable energy project, we help you reach your **strategic goals**:

- **Secure your investments**
- **Maximize your returns**
- **Optimize your cash flows**
- **Mitigate your risks**
- **Engage your stakeholders**

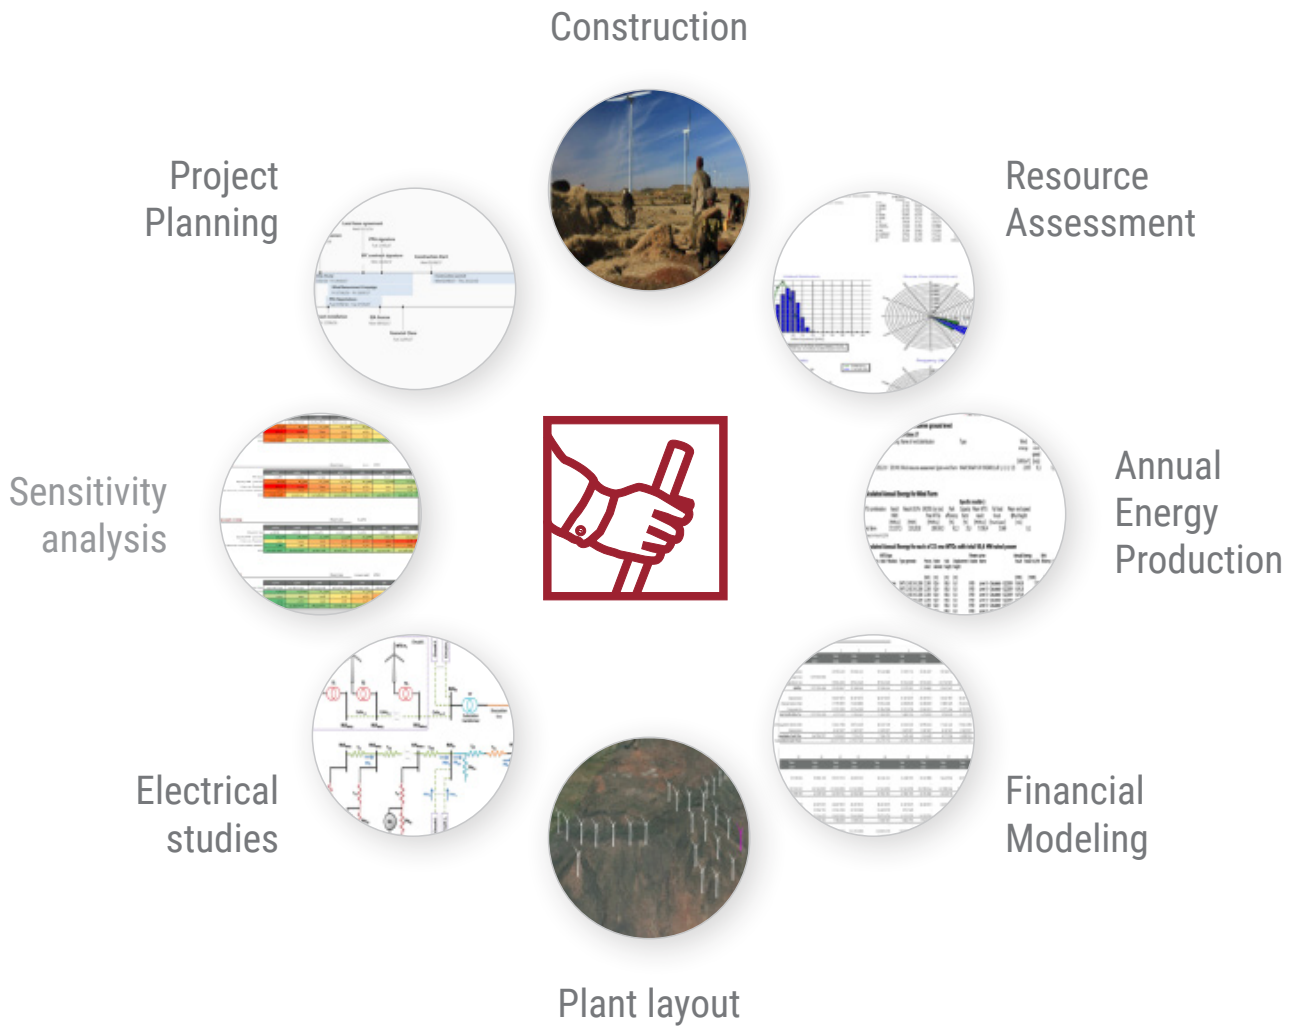

We provide our expertise in the following services:

- Market analysis
- Risk assessment & Mitigation strategies
- Technology assessment
- Capex and Opex analyses
- Wind / Solar Resource Assessment
- Energy production estimates
- Financial Modelling
- Feasibility studies
- Contract review
- Regulatory support

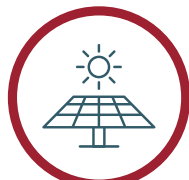

- Negotiation support
- (PPA, EPC, TSA, LTSA, TS)
- Construction supervision
- Operations and Maintenance reviews
- Performance assessment
- System design
- Operations and Maintenance reviews
- Project Development
- Owner's engineering

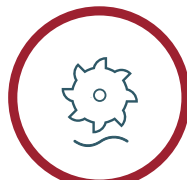

All along the life cycle of your renewable energy project, our independent experts stand by your side to secure every step of the value chain, until your project is delivered.
