

QiDO Energy Development is a German-French Consulting Boutique specialized in renewable energy. Besides providing business strategy and independent engineering services to our Clients, we also help them to recruit the best talents and experts for in situ short-term or long-term assignments.

QiDO's main clients are large utilities, technology providers, international agencies and project developers worldwide. Mostly operating on developing markets, QiDO is bringing technical & business expertise to support and boost the transformation of the local energy sector.

Established in 2011, we are trusted by first-class clients and partners in the international energy arena. They value our deep knowledge of the industry, high performance standards and our innovative, tailor-made solutions that bring real added value to their decision-making process.

To date, we have completed a large number of challenging missions all over the globe, engaging teams, building commitment and shaping the energy world of tomorrow.
